

Kiruthika Sivakumar

Software Engineer

Career Objectives

Aspiring Frontend Developer with experience in responsive UI development, reusable component design, and modern web application development using Svelte, TypeScript, HTML, and CSS. Familiar with UI/UX concepts and basic exposure to Figma. Passionate about developing scalable and responsive applications with clean and maintainable code.

Talent Next Certified Skill

Skill Details: Programming Fundamentals, Java, Spring, Spring boot, MySQL, Java Microservices, Java Front End Development, GitHub Copilot

Technical Competencies

Programming Language: Typescript, JavaScript, HTML5, CSS, Java , Spring

Tools: Visual Studio Code, Git, GitHub

Frameworks: Angular CLI, Svelte

Skills: Basic Knowledge of Figma, Responsive UI Design, UI/UX Concepts

Education Details

Qualification / Degree	Discipline	Education Institution	University /Board	Year of Completion
B.E.	Electronics and Communication Engineering	K.S.Rangasamy College of Technology	Anna University	2025
12 th Grade	Computer Science	St.Antony's Matric Higher Secondary School	Tamil Nadu State Board	2021
10 th Grade	General	St.Antony's Matric Higher Secondary School	Tamil Nadu State Board	2019

Project Experience Summary

Project Name	Community Based Food Management System
Organization	Mphasis
Duration	April 2025-May 2025
Environment	Vs code, Angular CLI, HTML5, CSS 3, TypeScript

Description: Developed a Community-Based Food Waste Management System to reduce food wastage by connecting food donors with volunteers for food collection and distribution. The application was built using Angular for the frontend and Spring Boot for the backend, with MySQL as the database. The system includes modules for user registration, login, food donation management, volunteer assignment, food availability tracking, and pickup management. Focused on developing responsive and user-friendly interfaces with seamless navigation and efficient data handling.

Responsibilities:

- Designed responsive frontend pages using Angular, TypeScript, HTML, and CSS. Implemented modules for donor registration, volunteer management, and food donation tracking.
- Improved UI/UX with responsive layouts for mobile, tablet, and desktop devices.
- Implemented form validation and error handling for better user experience.
- Designed and managed database tables in MySQL. Improved application responsiveness and user experience across devices.
- Used Git for version control and project management.

Project Name	Insurance Service
Organization	Mphasis
Duration	Nov 2025
Environment	Vs Code, JSON server, REST APIs, Postman, VS Code

Description: Developed a full-stack web application to manage health insurance purchases. Built the frontend using Angular, TypeScript, HTML and integrated with a JSON Server backend for API handling and data storage. Implemented premium calculation logic, validations, and smooth navigation for an enhanced user experience.

Responsibilities:

- Designed and developed responsive UI pages using Angular, HTML5, CSS3, and TypeScript.
- Implemented modules for insurance plan listing, premium calculation, and policy booking.
- Integrated REST APIs using JSON Server for fetching and storing application data.
- Developed premium calculation logic based on user input and eligibility criteria.
- Implemented form validations for age, email, and phone number to ensure accurate data entry.
- Created reusable components and improved UI/UX for better user interaction.
- Handled exception scenarios and displayed appropriate validation/error messages.
- Configured and managed JSON Server for mock backend, created db. Json for storing plans and bookings, and tested API requests using Postman.

Project Name	Paying Guest Accommodation
Organization	Mphasis
Duration	Dec 2025
Environment	Vs code, Spring Tool Suite, MySQL Workbench, Postman

Description: Developed a PG Accommodation Management System using Spring Boot to streamline interactions between tenants and property owners. The application enables tenants to search, compare, and view PG listings, while owners can manage accommodation details and availability. Implemented secure

CRUD operations, validations, and API documentation using Swagger, following a layered architecture approach for scalability, maintainability, and stability.

Responsibilities:

- Designed and developed RESTful APIs for tenant registration, PG discovery, owner listing management, and availability updates using Spring Boot.
- Implemented CRUD operations for managing PG details, tenant information, and booking-related functionalities.
- Designed and optimized MySQL database schemas with proper entity relationships between Owner, Place, and Tenant modules.
- Developed service and repository layers using dependency injection and interface-based architecture.
- Implemented validations and exception handling to ensure reliable and secure data processing.
- Integrated Swagger for API documentation and easier API testing.

Project Name	Ecommerce Website
Organization	Mphasis
Duration	Mar 2026
Environment	VS code, Svelte, TypeScript, HTML, CSS3, JavaScript, Git, GitHub

Description: Developed a responsive E-Commerce Web Application using Svelte and TypeScript to provide users with a seamless online shopping experience. The application includes features such as user login and registration, product listing, product detail's view, cart management, Wishlist, filtering and sorting products, and checkout interface. Focused on building reusable components, responsive UI design, smooth page navigation, and dynamic data handling through REST API integration.

Responsibilities

- Developed responsive and reusable UI components using Svelte/Svelte Kit and TypeScript.
- Implemented product listing, product details, cart, Wishlist, and checkout pages.
- Integrated REST APIs for dynamic products and user data handling.
- Implemented filtering, sorting, and search functionalities for products.
- Improved application responsiveness using CSS media queries and flexible layouts.
- Managed page navigation and routing within the application.

- Worked on state management for cart and Wishlist functionalities.
- Developed user-friendly and interactive UI/UX designs for enhanced customer experience.
- Created reusable frontend components to improve maintainability and scalability.
